VIKRAM GOLAIT

ANGULAR DEVELOPER | 2 YEARS OF EXPERIENCE

Email: vikramgolait1660@gmail.com | Phone: 7887589262
Portfolio: https://vikramgolait.netlify.app

PROFESSIONAL SUMMARY

Angular Developer with 2 years of experience in frontend application development, UI enhancements, bug fixing, and REST API integration. Worked with Angular 19 and 20, TypeScript, RxJS, BehaviorSubject, Git, HTML, CSS, and JavaScript. Experience includes maintaining enterprise web application features, working with reusable components, handling account-dependent UI behavior, and supporting Angular/component-library upgrades. Focused on maintainable code, reliable UI behavior, and resolving application issues.

TECHNICAL SKILLS

Frontend: Angular 19, Angular 20, Bootstrap 5, TypeScript, PrimeNG, JavaScript, HTML5, CSS3

Tools and Version Control: Git, GitHub, Angular CLI

Additional Technologies: React Native, Node.js

PROFESSIONAL EXPERIENCE

Angular Developer | []
March 2025 – Present

- Develop and maintain enterprise web applications using Angular and TypeScript.
- Integrate REST APIs and manage backend data using Angular services and NSwag-generated API clients.
- Resolve UI defects, improve component behavior, and fix account-dependent data display issues.
- Use RxJS and BehaviorSubject for reactive programming and shared state management.
- Support Angular upgrades, component-library migrations, and UI enhancements while maintaining existing functionality.
- Collaborate through Git-based version control, branch management, and code integration.

PROJECTS

SBM — WealthMapper Wealth Portal Modernization
Technologies: Angular 20, TypeScript, RxJS, Bootstrap 5, Highcharts, NSwag, REST APIs, OAuth, Luxon

Modernized a banking and wealth management application for retail customers and financial advisors, supporting portfolio management, holdings, transactions, documents, dashboards, reporting, and account-related workflows. Integrated backend REST APIs and contributed to Angular 20 migration, access control, UI enhancements, and defect resolution.

i1Wealth UI — Enterprise Wealth Management & Banking Application
Technologies: Angular 19, TypeScript, ABP Framework, RxJS, ag-Grid, Highcharts, NSwag, SignalR, SurveyJS

Developed and enhanced an enterprise wealth management and banking application for customers, financial advisors, and administrators. Worked on portfolio management, trading, financial planning, KYC, risk analysis, open banking, reporting, and real-time communication, integrating REST APIs and supporting secure, multi-tenant user experiences

i1Fit — Cross-Platform Wellness Mobile App

Technologies: React Native, React, TypeScript, React Navigation, Axios, AsyncStorage, HealthKit

Developed a cross-platform wellness mobile application for Android and iOS, featuring wellness dashboards, activity tracking, mood logging, brain games, challenges, rewards, and health-device integration. Integrated REST APIs and implemented user profiles, notifications, and wellness score tracking to deliver a seamless mobile experience.

EDUCATION

Bachelor of Science (B.Sc.)
Babasaheb Ambedkar Marathwada University | 63%

Higher Secondary Certificate (HSC) — Maharashtra State Board | 56%

Secondary School Certificate (SSC) — Maharashtra State Board | 62%

TRAINING

Frontend Software & Web Development — Techreal Institute
